Based on the modular design concept of platform, WT2000 series doubly-fed wind turbines provides customized scheme design of 2 ~ 2.2MW power level, 80 ~ 140m tower and 103 ~ ...

the 2 MW platform? Our 2 MW platform provides industry-leading reliability, serviceability and availability. Durable and dependable, the platform is built on technology that has been proven ...

The SGT-50 is an industrial gas turbine with a power output range of 2MW. The turbines combine minimal maintenance in a compact footprint that make them ideal for continuous power ...

Introduced in 2000 and incrementally improved over the years, the 2 MW platform is well suited for optimising production at park level. Turbines installed. Installed capacity. Each 2 MW ...

Spirit 2MW is highly reliability and fuel-flexible with low lifecycle costs. The "Plug-n-Play" package feature enables easy transportation and reduces installation time and costs.

New funding follows the successful demonstration of key technologies and the design of a 2MW powertrain system in Phase 1. This represents a key step toward a full-scale ...

Designed for medium wind speeds, the 2.2-2.4MW turbine provides a 51% increase in swept area with the 107m rotor, and an extra 350-450 kW output at rated wind speed compared to the ...

Built on a legacy of technical innovation and product quality, GE Vernova's workhorse turbine fleet incorporates continuous improvements to drive performance, reliability, and unparalleled value.

Gamesa is a leading company in the design, manufacturing, installation, operation and maintenance of wind
