The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

Each container is equipped with a photovoltaic array, a battery bank, and a generator -- all custom-sized to meet the specific needs of the customer. With integrated remote monitoring ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Energy storage systems help reduce railway energy consumption by utilising regenerative energy generated from braking trains. With various energy storage technologies ...

These are tailor-made energy systems that combine solar power generation with battery storage, engineered specifically for the unique demands of each site. Highjoule delivers personalized ...

This energy storage system is ideal for pairing with renewable energy sources such as solar or wind. It efficiently stores excess energy during peak production periods and supplies it during ...

Our system switches between grid-connected and off-grid modes seamlessly, ensuring uninterrupted power

supply across various applications. This feature is crucial for commercial ...

Wide Temperature Range: They can operate effectively over a wide temperature range, making them suitable for both high and low-temperature environments.

Explore our modular containerized energy storage system with integrated power conversion. A flexible, mobile solution for rail depots, testing, and industrial backup.
