The design is verified using Matlab-Simulink simulation using parameters of a real PV module, switches and passive elements to be close to practical work. The simulation results prove the ...

A single-phase grid-connected inverter, with unipolar pulse-width modulation, operates from a DC voltage source and is characterized by four modes of operation or states.

The general structure, modeling and simulation of the grid-connected PV inverter are presented as well as the virtual simulation results in the Matlab/Simulink platform.
