UNSW targets 1,000GWh of energy storage in Australia by 2050, ensuring a resilient, sustainable energy system for a healthy future. View our storage technologies.

Canadian company Hydrostor has secured NSW government approval to build a 200 MW/1.6 GWh CAES facility in a disused mine ...

This large-scale, long-duration energy storage facility is poised to reinforce the reliability of the NSW electricity grid while ...

This large-scale, long-duration energy storage facility is poised to reinforce the reliability of the NSW electricity grid while supporting Australia's transition to renewable energy ...

Underground storage of compressed hydrogen or compressed air can deliver backup and firming supply, account for seasonal changes in load and provide strategic ...

Our core product is the microemulsion flow battery (MeFB), designed for long-duration energy storage (LDES). The MeFB offers a unique combination of advantages: low ...

Underground storage of compressed hydrogen or compressed air can deliver backup and firming supply, account for ...

Construction of the 8-hour long-duration energy storage (LDES) project, located adjacent to the Potosi Mine, is scheduled to take place later this year and last between three ...

Not only is the Air Battery the first modular and scalable adaptation of CAES but its uniquely the only energy
