What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

What is a genset container?

Genset containers, also known as generator set containers, are specialized enclosures meticulously engineered to house and safeguard generator sets. These purpose-built structures provide a controlled environment, shielding the generators from external elements such as harsh weather conditions, dust, and debris.

Why do generators need containerization?

Containerization allows for compatibility with various modes of transportation such as trucks, trains, and ships, enabling seamless intermodal logistics. Containerization enables proper insulation of the generators to ensure that the temperature of components remains within acceptable limits.
