What is a medical-grade uninterruptible power supply (UPS) system?

Our medical-grade uninterruptible power supply (UPS) system secures seamless backup power and protects your equipment from damage. These solutions will instantly switch your system to a backup power supply with no lapses, preventing dire consequences during medical procedures.

Why should you use uninterruptible power supply equipment?

Our uninterruptible power supply equipment efficiently does both to ensure you can carry on with your tasks without delay. These systems recover sufficient power for medical devices and imaging equipment for successful results.

Does Astrodyne TDI have a medical power system?

The Power Bridge system from Astrodyne TDI is compact and rack-mountable for convenient installations. The UPS provides medical isolation internally, which eliminates the need for an external isolation solution. Our new MediPower(TM) system medical power system provides 175VA of output with a peak power of 250VA.

Why do hospitals have uninterruptible power supplies?

Many hospitals have uninterruptible power supplies dedicated to specific testing bays to ensure a smooth and constant supply of utility power. Navigate outages safely and effectively during emergency situations.

CyberPower manufactures high-quality uninterruptible power supply and UPS products for hospitals, medical clinics, and healthcare facilities.
