From grid-scale batteries revolutionizing South Australia's energy landscape to emerging hydrogen storage facilities in Western ...

Australia's energy storage market is growing at breakneck speed--the largest battery project to be commissioned in 2023 was the Riverina Energy Storage System in New ...

Australia's rapid BESS deployment provides a blueprint for other countries, and it shows that effectively integrating large-scale BESS into power grids can accelerate renewable ...

CleanCo is reinforcing its commitment to Queensland's clean energy future by exploring the potential to trial Australia's largest grid-connected NAS® Battery Energy Storage ...

NEWS: A massive new \$450 million Tesla Megapack battery energy storage system is now operational in Victoria, Australia. It's the biggest completed battery project on ...

This makes it Australia's largest approved BESS with around 2,800MWh energy storage capacity, the same size as the existing black coal-fired power plant connected to the ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, ...

The Waratah Super Battery in New South Wales is Australia's largest energy storage system, with a capacity of 350 MW/700 MWh, expanding to 850 MW/1,680 MWh by ...

The Waratah Super Battery in New South Wales is Australia's largest energy storage system, with a capacity
