How do I remotely control the radio?

You can remotely control the radio only if on the Base Station Remote Utility Software is up and running. The software should NOT be connected to the Radio under Radio list and Server List. When you remotely connect to your radio, this screen will show the BUSY icon. Click Start. Click Run.

How does 4dqpsk modulation work?

If the Base station communicates with Terminal 5, it uses the $\pi/4$ DQPSK modulation even for the hop between the Base and Repeater, not only for the link between Repeater and Terminal 5. All units are configured with a Radio IP address within 10.10.10.0/24 subnet. The Ethernet subnets are different for each unit.

How do I change a pre-cabled protected station?

Page 417 Product Options | 417 Users can change an existing Protected Station from one option to the other option by following the procedure: To change a pre-cabled Protected Station from one option to the other option: 1. Disconnect the power supply, antenna/s, interface cables and any other connections 2.

Is there a repeater configuration in Terminal 4?

There is no "repeater" configuration in Terminal 4. The terminal itself is configured in the exact same way as Terminals 5 and 6. The communication is managed by the Base station which forwards data either directly or via this repeater. Since the firmware 1.6, RipEX units can also be configured with various modulation rates for individual links.

An IP Network Remote Interface provides a means of remotely controlling base stations by any available Wide Area Network (WAN) or Local Area Network (LAN) IP connection.

Enable Network Extension Mode on all radios required in the extended network radio list including the radio logged into, the remote radio being ...

HGM4020T genset controller adopts micro-processor technology with precision parameters measuring, fixed value adjustment, time setting and set value adjusting and etc functions. All ...

The topology consists of one Base station (there can only be one) and 6 terminals (remote RipEX units). One of these terminals serves as a ...

You can remotely control the radio only if on the Base Station Remote Utility Software is up and running. The software should NOT be connected to the Radio under Radio list and Server List.

The Installation Wizard is the first screen you'll encounter if the Base Station is new and not yet configured. You will need your installer's password to access the Installation Wizard.

Firewall Considerations
Setting up the RS-BA1 Remote Utility Software for the Base Station
Connection Errors
Setting up the RS-BA1 Remote Control Software
Accessing the RS-BA1 Remotely over the Internet
Open the RS--BA1 Remote Utility Software. Select Network Setting. Enter your Computer's Name in the PC Name field. Choose FTTH in the Internet Access Line field. Click Apply. Close (exit) the RS--BA1 Remote Utility software and open it again. Select Server Setting. Click the User List tab. Enter your Us...

The topology consists of one Base station (there can only be one) and 6 terminals (remote RipEX units). One of these terminals serves as a repeater for other two.

A single Aprisa SRi is configurable as a Point-To-Multipoint base station or remote radio. This guide provides a quick startup and basic installation instructions for the Aprisa SRi radio ...

CAUTION: If the RT7000 needs to be relocated, wait at least 5 seconds after unplugging it before reconnecting the cable to the same base station port, or use a differ-ent base station port.

The SPS GNSS modular receivers (such as the R750) have a front panel and keypad that enables the base station receiver to be initialized and set up without needing a controller; ...

In wireless technologies including GSM, CDMA, UMTS, and LTE, this radio equipment operates remotely from the BTS/NodeB/eNodeB, and is also ...
