The company revealed the launch of its new solar panel developed in Brazilian territory. The initiative represents not only a technological advance, but also a milestone for ...

In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts. The Brazilian solar sector is experiencing ...

This article explores how Brazil's latest solar technology reshapes the photovoltaic industry with its green metallurgical silicon, high-purity polysilicon, and an innovative recycling ...

Solar is now Brazil's second-largest source of electricity. Experts say its growth must also reach and respect communities cut off from the grid. Student Brenda Rodrigues da ...

The data consider the sum of large-scale solar PV plants with small and medium-sized self solar PV generation systems, on roofs, ...

As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, ...

Solar is now Brazil's second-largest source of electricity. Experts say its growth must also reach and respect communities cut off ...

With 600 solar panels and an installed capacity of 339 kWp, the plant is expected to generate more than 500 MWh annually - which should represent savings of around R\$340 per ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic
