What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

How much electricity does Mexico use in 2022?

According to Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN), the electricity consumption of the National Electricity System was 333,662 GWh in 2022, which represented an annual increase of 3.4 percent.

What is the future of power generation equipment in Mexico?

The market for power generation equipment in Mexico is estimated to increase 1.05 percent from 2022-2023, while exports from the United States to Mexico are expected to increase 0.93 percent.

Despite the challenges presented by energy policies and delays in permits, the Mexican market remains competitive for suppliers of electricity infrastructure and smart grid ...

Mexico's energy sector is undergoing a major transformation, with energy storage playing a crucial role in its future. The newly established regulatory framework sets the ...

The administrative provisions regulating the integration of EES into the National Electric System are in effect as of Monday. The ...

Its injection and/or consumption goes directly to the National Transmission Grid (RNT) or the General Distribution Grid (RGD).

Non-Associated SAE: Battery-based electrical energy storage system that will not be integrated into a power
