What does the Big Canberra battery mean for Eku energy?

The Big Canberra Battery represents a significant milestone for Eku Energy as we celebrate our first GWh of battery energy storage in delivery in Australia. This brings our global portfolio of battery energy storage assets to over 4GWh.

What is the Big Canberra battery project?

The Big Canberra Battery project will provide renewable energy security across the electricity grid. It will help grow the ACT's renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the territory. Building a cleaner future

Will a big battery power Canberra?

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods. The Williamsdale battery will be developed, built and operated by Macquarie Group offshoot Eku Energy.

Will Canberra's energy supply be future-proof?

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development application has been approved to deliver Stream 1 of the project - a grid-scale battery in Williamsdale. This ACT Government has partnered with Eku Energy on this project. Construction will begin later this year.

The Government has partnered with Eku Energy to deliver the next stage of the Big Canberra Battery with a large-scale battery storage facility in Williamsdale.

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough ...

As Australia accelerates its renewable energy transition, the Canberra 2024 Energy Storage Power Station

Tender represents a pivotal moment for global energy storage providers. This ...

The project, a joint effort between the ACT Government and Eku Energy to develop Stream 1 of the Big Canberra Battery Project, will deliver an impressive 250 megawatts (MW) ...

It will be jointly owned by Eku Energy and the ACT Government. The project, estimated to cost \$400 million and create approximately 180 - 200 jobs, will store enough renewable energy to ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid ...

It will be jointly owned by Eku Energy and the ACT Government. The project, estimated to cost \$400 million and create approximately 180 - 200 jobs, ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for ...

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize ...

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development application has been approved to deliver Stream ...

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku ...
