The rush to Begin Construction hits an immediate speedbump. Solar (and, to a lesser extent, wind) developers became keenly focused on accelerating Begin Construction ...

Energy storage escaped much of the pain inflicted on solar in the recent legislative changes, but foreign entity restrictions may create some supply-chain challenges.

Facilities that begin construction in 2034 will be eligible for 75% of the full credit amount, dropping to 50% for construction beginning in 2035, and phasing out entirely for ...

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic ...

Under prior law, these projects would have had until Dec. 31, 2032 to begin construction. The bill also enacts cumbersome FEOC restrictions, which are primarily ...

The budget reconciliation bill allows power and storage projects that start construction by December 31, 2025 to avoid some new restrictions on use of Chinese equipment.

October 13 - U.S. energy storage installations are set to hit record highs this year but lower deployment rates are expected from 2026 as developers adapt to a suite of new policies from ...

While the changes bring new issues to developers in the US, many market leaders agree that having more clarity on future projects is a welcome change from recent months.

To qualify, these projects must either be completed by the end of 2027 or begin construction within the next
