-----

In the communication power supply field, base station interruptions may occur due to sudden natural disasters or unstable power supplies. This work studies the optimization of ...

The legislation includes measures aimed at speeding up investments in the power grid to free up capacity for additional renewable energy projects. Ongoing investments in ...

Since Chilean co-located storage assets don't require an Environmental Impact Statement (known locally as the DIA), development times for storage assets have been cut in ...

This article presents an overview of the state-of-the-art in the design and deployment of solar powered cellular base stations.

Beyond providing energy shifting and capacity contribution, the BESS project will deliver advanced grid services such as grid forming, black start, and inertia support that are ...

This approach captures the contemporary dynamics of Chile's energy transition, offering insights into both its achievements and regulatory gaps, and critically assessing the ...

The Chilean regulatory landscape has evolved to include battery storage with last year's publication of Decree 70, which defined the rules for recognizing the capacity provided ...

Discover how solar and storage projects by Zelestra are shaping Chile's grid, enhancing reliability, and driving Chile's energy transition.

This report was authored by the Chile Ministry of Energy in collaboration with Clean Energy Ministerial
