What is China's advantage in supporting clean energy in Africa?

China is uniquely well positioned to support clean energy expansion and access in sub-Saharan Africa because it is home to more than 80% of the world's renewable energy manufacturing. This makes the country a good partner in Africa, as it is also Africa's largest bilateral trading partner and one of its biggest sources of foreign aid.

Could China play a key role in Africa's energy crisis?

China could play a key role in addressing Africa's energy crisis. China is not only Africa's largest bilateral trading partner and one of its biggest sources of foreign aid, but is also home to more than 80% of the world's renewable energy manufacturing.

Does China have an Africa Solar Belt?

China's first major program under its new strategy of shifting overseas renewable energy investments toward smaller-scale initiatives is the Africa Solar Belt.

How does China finance power plants in Africa?

In the past, the bulk of Chinese financing had been driven by the backing of China's two policy banks - the Export-Import Bank of China (EXIM) and the China Development Bank (CDB) - and directed particularly towards coal-fired power plants. The two banks had issued \$182bn in loans across Africa, primarily into the energy sector.

Between development, dependence, and the energy transition, some environmentalists worry that China is playing a double game that is ...

This paper examines China's growing role in Africa's renewable energy landscape through a political economy and developmental state lens, using the Garissa Solar PV project ...

Thus, the false narrative of overcapacity from the Western-led countries to counter Beijing's "made in

China" drive on new energy ...

Informed by a conceptual framework that builds on multi-level institutional analysis, we assess the institutional challenges constraining the scalability of Chinese renewable energy projects...

New data reveals a rebound in Chinese financing of renewable energy projects in Africa in 2023, following a lull over the past few years.

Our key argument is that China's institutional framework that governs its overseas activities, which has played a crucial role in promoting conventional energy projects in Africa, requires an ...

China's photovoltaic industry continues to bring reliable power to African nations. In Kenya, the Garissa 50 MW Solar Power Plant, built by a Chinese company and commissioned ...

A new report - China's evolving role in Africa's energy transition - by ODI Global, an independent, global affairs think tank, ...

The CGSP China-Africa Energy Tracker is an interactive map showing Chinese energy projects across Africa. The map aims to track all projects that include Chinese financing, ...

Between development, dependence, and the energy transition, some environmentalists worry that China is playing a double game that is harming Africa in its fight ...

Thus, the false narrative of overcapacity from the Western-led countries to counter Beijing's "made in China" drive on new energy vehicles, photovoltaics and lithium batteries is ...

A new report - China's evolving role in Africa's energy transition - by ODI Global, an independent, global affairs think tank, explores the changing nature of China's engagement ...
