[0001] One or more embodiments disclosed herein relate to a wireless communication method in a wireless communication system that includes a base station (BS) including multiple antenna...

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme ...

presents a following method: location selection and network optimization for the wireless communication network. First, it collects the experimental data set of base station locati.

Wireless communications In radio communications, a base station is a wireless communications station installed at a fixed location and used to communicate as part of one of the following: a ...

Explore the key differences between RRH-based and traditional base station architectures in cellular communication, highlighting advantages and ...

EIA/TIA Interim Standard, Cellular System Dual-Mode Mobile Station-Base Station Compatibility Standard, IS-54-B, Telecommunications Industry Association, April 1992.

In this paper, we address the classical problem of locating base stations for a mobile cellular network to serve mobile users in a given geographical area considering the users" ...

Explore the key differences between RRH-based and traditional base station architectures in cellular communication, highlighting advantages and applications.

To cope with this complex problem, researchers are increasingly adopting genetic algorithms (GA) and

machine learning (ML) methods to improve the deployment efficiency and ...

The embodiment of the invention provides a communication method, a base station and a terminal device.

Satellite direct-to-device communication takes off -- discover two approaches to connecting the unconnected.

The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. They are ...
