---

We are the global leaders in SMR nuclear technology with our groundbreaking NuScale Power Module.

Compact, energy-efficient microreactors could soon help generate electricity for remote locations.

Last Energy is a new nuclear energy solution for customers of any size - rapidly deploying, affordable, clean, baseload power at scale with a full-service delivery model.

Located at the Idaho National Laboratory, DOME is designed to test microreactors that produce up to 20 megawatts of thermal energy. Unlike traditional nuclear plants that supply hundreds of...

Here's a look at three companies with customers secured and significant financial backing. The nuclear industry is racing to launch advanced small reactors by the early 2030s, ...

Compact Design: Its smaller size makes it easier and quicker to build than larger reactors. This reduces construction costs and timelines. It offers cost-effective electricity through fast ...

A fully integrated XENITH microreactor solution, complete with power conversion and integrated shielding, deploys easily and provides reliable power, all within a compact footprint of less than ...

Small, transportable and mass-produced "microreactors" are seen as part of the future of nuclear power. Westinghouse scientists are at work developing a nuclear ...

Advanced Small Modular Reactors (SMRs) are a key part of the Department's goal to develop safe, clean, and affordable nuclear power options. The advanced SMRs currently under ...

Below is a curated list of portable power stations confirmed through manufacturer disclosures, site visits, and
