At MODS, we design and fabricate high-performance generator and power units built from shipping containers. Our solutions provide reliable energy generation and storage for ...

Contargo AG relies on the dependable and particularly quiet energy chains from igus. Find out more about the planning, implementation and results of the special solution here.

Originally launched for limited markets in 2021, the 40-ft ...

our eco° GEN-C series features all-in-one packaged power generation solution, engineered for mobility, easy deployment and scalability. each power container is engineered to meet specific ...

This research study proposes a novel approach for sustainable energy generation by integrating the mechanical energy of conveyor belt rollers in industrial settings.

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up ...

Due to the offset between the upper and lower run, the plastic rollers do not roll over but past each other, allowing for particularly smooth operation. This reduces the coefficient of friction ...

The Martin Roll Gen System was designed to create a self-contained mini power station that allows operators to run electrical monitoring systems and safety mechanisms.

Martin Engineering has introduced an innovative technology that uses the kinetic energy from a moving conveyor belt. The Martin ® Roll Gen(TM) System allows operators to run electrical ...

Martin Engineering has introduced an innovative technology that uses the kinetic energy from a moving conveyor belt to generate ...

Martin Engineering has introduced an innovative technology that uses the kinetic energy from a moving conveyor belt to generate enough power to run a wide variety of ...

This format offers a portable, weatherproof, and secure power generation unit that is ideal for a wide range of industrial, commercial, and emergency backup applications.
