Listed below are the five largest upcoming Solar PV power plants by capacity in Croatia, according to GlobalData's power plants database. GlobalData uses proprietary data ...

In late September 2025, Croatia achieved a significant milestone in its renewable energy sector. The solar power plant in the city of Belisce became the first in the country to be connected to ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW milestone in May.

An environmental assessment is required because the investor, the local company Funicula, plans to develop the site as a standalone solar power plant. The selected location is ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in ...

On the sun-drenched plains near Benkovac in Zadar County, a transformative project is taking shape. Croatia's largest solar power plant, SE Korlat, is set to redefine the ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. ...

On the sun-drenched plains near Benkovac in Zadar County, a transformative project is taking shape. Croatia's largest solar power ...

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

By the end of 2024, Croatia had reached 3.8 GW of installed renewable energy capacity, with solar energy doubling its figures in one year. By 2025, photovoltaic power is ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in the country's renewable energy journey.
