How do energy storage systems work?

Energy storage systems capture and hold energy for later use by shifting when and how electricity supply and demand are balanced. They're charged using electricity from the power grid during periods of low demand or extra capacity.

Why is energy storage important?

Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. Energy storage is essential to a resilient grid and clean energy system.

Are energy storage projects safe in New York State?

New York State has some of the most rigorous safety standards for energy storage projects in the country, reinforced by independent nationally recognized experts to ensure full compliance.

A proposed site for an energy storage facility in Dade County is drawing safety concerns from residents. EPB plans to build the facility on Griffin Road in West

What are EPB's Generation Use Cases? How did we get into the Generation Business? What have we done so far? What's next? Why Energy Storage? Commercialization of this ...

EPB is adding 36 megawatts of energy storage at two of its decommissioned substations, part of a broader effort to add 150 megawatts of capacity over the next several ...

EPB switched power for nearly 400 customers in Sale Creek to two large batteries at around 10 a.m. on Oct. 8, using one of its grid-level energy storage systems to avoid ...

All EPB customers are benefiting from an innovative way that both reduces the cost of electricity and reduces the potential for community-wide power outages, officials of the ...

EPB staff members have been given more leeway to pursue smaller scale energy storage projects, which leaders said will enable the Chattanooga utility to keep costs low for ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Energy Storage Technology Advancement Partnership (ESTAP) Conducted under contract with Sandia National Laboratories, with funding from US DOE Office of Electricity. Facilitate ...

EPB, a municipal electric distribution utility serving approximately 190,000 homes and businesses in Chattanooga, Tennessee, has installed energy storage systems at four ...
