What is the energy cooperation-based storage sharing strategy?

In the energy cooperation-based storage sharing strategy, all participants aim to maximize the overall benefits of the alliance, building on energy trading to overcome the limitations of the previous two sharing models.

What are shared energy storage operational strategies?

Current research on shared energy storage operational strategies focuses on three main areas: capacity allocation [14, 15], energy trading [16, 17], and storage sharing based on energy cooperation. Under the capacity allocation strategy, consumers are limited to using only the storage capacity assigned to them.

How does ESMAP support developing countries in deploying energy storage?

ESMAP is supporting developing countries in deploying energy storage through providing access to concessional finance, technical assistance, and addressing key knowledge gaps through an international Energy Storage Partnership (ESP).

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).
