The Solar Energy Industries Association (SEIA) has released a whitepaper recommending the US deploy 10 million distributed solar ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

With the rise of solar and wind capacity in the United States, the demand for battery storage continues to increase. The Inflation Reduction Act (IRA) has also accelerated ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

With US electricity demand rising, especially from AI and data centres, solar and storage remain an affordable, fast solution for energy growth. The SEIA has stated that it will ...

Today, the U.S. Department of Energy released its draft Energy Storage Strategy and Roadmap.

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

-- The Solar Energy Industries Association (SEIA) is unveiling a vision for the future of energy storage in the United States, setting an ambitious target to deploy 10 million ...

The Solar Energy Industries Association (SEIA) has released a whitepaper recommending the US deploy 10 million distributed solar installations and reach 700GWh of ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

With these reforms, energy storage can scale to meet the moment: strengthening the grid, lowering costs and securing America's energy future. These steps are not optional--they ...
