-----

The key to utilizing energy storage effectively and economically lies in the planning configuration method. To address this, this paper proposes an energy storage planning model ...

In this paper, we present an optimization planning method for enhancing power quality in integrated energy systems in large-building microgrids by adjusting the sizing and ...

To address these deficiencies, this paper introduces a bi-level planning model for distributed energy storage that incorporates the influence of extreme weather on transmission ...

Traditional scheduling methods are no longer adequate, making reasonable planning of distributed power generation and energy storage configurations particularly crucial. ...

This paper proposes an integrated hierarchical coordination framework for planning and operations to address the decoupling ...

Therefore, in this paper, a coordinated planning and management (CPM) framework for the electric power transmission and distribution systems with a novel bilateral sharing ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

This paper proposes an integrated hierarchical coordination framework for planning and operations to address the decoupling between long-term capacity planning and short-term ...

This paper presents an optimal planning and operation architecture for multi-site renewable energy generators

that share an energy storage system on the generation side.

To address these issues, this paper proposes a multi-stage collaborative planning method for transmission networks and energy storage. This method considers the non-line ...

The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally. As ...
