-----

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts ...

On October 18, NYSERDA filed its Bulk Energy Storage Implementation Plan Proposal (the "NYSERDA Proposal"), the last ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

On October 18, NYSERDA filed its Bulk Energy Storage Implementation Plan Proposal (the "NYSERDA Proposal"), the last document needed for PSC approval before ...

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid.

From solar farms in the Sahara to underwater data centers in the Baltic Sea, these circular powerhouses are proving that sometimes, the best solutions come in round packages.

Energy storage beyond lithium ion explores solid-state, sodium-ion, and flow batteries, shaping next-gen energy storage for EVs, grids, and future power systems.

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released a draft road map in December 2022 ...

A large lithium battery energy storage system operated by Key Capture Energy that can power 15,000 homes for two hours during outages or high demand sits surrounded by a fence in ...

Grid energy storage, also known as large-scale energy storage, is a set of technologies connected to the electrical power grid that store energy for later use. These systems help ...

These innovative CO2 batteries from Energy Dome promise long-duration energy storage for the grid, and reliable 24/7 clean power for data centers.

Hochul announced plans in January 2022 to double New York's previous energy storage goal of 3 GW by 2030. The state released ...
