Immediate Safety Procedures Upon detecting any electrical burning smell, your primary objective is to eliminate the power source before attempting to locate the problem. If ...

Up to 1% cash back! Yes, it's normal for a new PSU to smell funny when it runs, I've rarely had a PSU that didn't smell at the ...

Yes, it's normal for a new PSU to smell funny when it runs, I've rarely had a PSU that didn't smell at the beginning. Some plastics (plasticizer) and lacquers for example are ...

I tried connecting my old PSU but it only has a 6 pin connector for the GPU, what should I do? Get another PSU, that's all you can do really. Don't take shortcuts with power ...

New electronic smell with mainboards, GPUs, PSUs etc. is normal. It should be gone after the first days of stress testing. If you skip a few days of burn tests/stress testing with ...

A burnt smell can be alarming, and understanding the root cause can save you from extensive repairs or replacements down the line. In this article, we will delve into the potential reasons ...

It might have just been some dust if the PC hasn't been on for a while, but since you said it was like a plastic smell it's not worth the risk to your other components or the possible fire risk in a ...

Based entirely on your comments, it sounds like the power supply has burned out. HP uses proprietary power supplies so you can't just order a new PSU online and replace it.

I just unpacked a brand new power supply unit (PSU) from Microcenter, and it has a strange, off-putting odor that reminds me of a zoo or manure. Is this common for a PSU ...

New electronic smell with mainboards, GPUs, PSUs etc. is normal. It should be gone after the first days of stress testing. If you skip a few days of burn tests/stress testing with a new system, ...

While a burning smell from your power supply unit can be alarming, understanding its potential causes and implications can prepare you to take appropriate action.

The rear of the PSU should be turned downward to allow water to escape. Try again the next day to see if the smell has gone, if the PSU runs silently, you are good. If step 6 ...
