-----

Latvia's current NECP in force has set the goal to increase the share of RES to 50% in 2030. However, Latvia is the only country that does not include specific solar targets in its current ...

The project not only contributes to Latvia's clean energy capacity but also sets a powerful precedent for future hybrid projects across the Baltic states, paving the way for a ...

A 65 MW solar and 92 MWh storage project by European Energy, Sampension and Luminor in Latvia advanced the country's transition toward greater grid flexibility.

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among ...

This expansion is a core component of Latvia's National Energy and Climate Plan, which targets a 50% share of renewables in the country's energy mix by 2030, with an ...

As part of the REPowerEU plan, the European Commission adopted an EU solar energy strategy in May 2022, identifying remaining barriers and challenges in the solar sector ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy ...

Based on simulations performed for various levels of vRES installed capacities, we evaluated the hosting capacity of the Latvian grid for each of the innovative measures in study.

Wait, no - it's not just about the hardware. Latvian engineers have sort of cracked the code on rapid

deployment. Their containerized systems can be operational within 48 hours of delivery, ...

As can be seen, Latvia is currently focusing mainly on BESS, but research on the potential of power to x or power to H2 in Latvia is also being actively developed. Given Latvia's ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia.

As can be seen, Latvia is currently focusing mainly on BESS, but research on the potential of power to x or power to H2 in Latvia is also ...
