Can battery storage support Finland's power grid?

One of the world's northernmost battery storage systems is now supporting Finland's power grid as part of a joint venture between Sungrow and FRV AmpTank. In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid.

Where is Finland's new battery storage facility located?

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, equipped with 26 PowerTitan 1.0 containers from Sungrow, delivers 30 MW of output and 60 MWh of storage capacity.

How can a greener energy supply be achieved in Finland?

The project in Simo is a prime example of how the current transition to a greener energy supply can be achieved in Finland: through the intelligent combination of renewable energy sources with powerful storage solutions. The result is a clean, stable and future-proof power grid. (hcn)

Will Asko provide fast-charging stations?

reported last month that it has signed a framework agreement for providing fast-charging stations to ASKO, the largest grocery retailer in Norway. The retailer is bringing rapid charging stations to its 13 logistics depots as part of a plan to electrify its fleet of 700 lorries by 2026.

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, ...

Finland is lighting up -- even under grey skies. This white paper from Solarplaza captures Finland's accelerating clean energy journey, spotlighting its ambitious 23+ GW solar ...

The hot air is then circulated in the container Fast Charging: Electricity containers can supply fast-charging stations for electric vehicles (EVs), ensuring a consistent and high-power supply for ...

These containers are masters of "work smarter, not harder." A 60kW BESS system can sip low-power

electricity from the grid (no overloads, no angry utility calls!) and blast out ...

We reached an important milestone in early 2025, when the Port of Helsinki achieved its own carbon neutrality target. Our carbon neutrality programme has included a ...

Finnish charging solutions are helping to usher in the era of electric road traffic in different parts of the world. Kempower reported last ...

Looking ahead, PostNord plans to scale fast charging infrastructure within Finland and throughout the Nordics. While owning fast chargers offers ...

Meta description: Explore how photovoltaic container systems in Tampere, Finland, provide reliable renewable energy solutions. Discover industry trends, cost-saving case studies, and ...

?? Like the rest of the Nordics, Finland is soaring to the front when it comes to charging infrastructure -- and much of this is thanks to their emphasis on ultra fast chargers. ?...

Finnish charging solutions are helping to usher in the era of electric road traffic in different parts of the world. Kempower reported last month that it has signed a framework ...

This article explores how cutting-edge energy storage solutions optimize EV charging networks, support renewable integration, and address Finland's unique energy challenges.

Looking ahead, PostNord plans to scale fast charging infrastructure within Finland and throughout the Nordics. While owning fast chargers offers clear benefits, Ilmo notes that public chargers ...
