Hitachi Energy has secured a contract from Nordic Electro Power (NEPower) to deliver power conversion solutions for the largest battery energy storage system (BESS) in ...

The energy storage facility delivered by Merus Power to Lappeenranta, Finland, has been completed and put into market use on 15 May 2025. The energy storage facility is ...

This pioneering project enhances grid stability, supports renewable energy integration, and establishes replicable frameworks for future storage developments across Finland and Sweden.

With wind power generation jumping 23% year-on-year in Q1 2025 [1] and solar capacity projected to triple by 2027 [3], Finland's energy storage industry is racing to solve its most ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage ...

Advanced power conversion technology will support a 125 MW energy storage site in Haapajärvi, helping stabilise Finland's electricity grid and reserve market.

As energy stakeholders anticipate the completion of the Nivala-based infrastructure, the project led by SEB Nordic Energy's Locus Energy and Ingrid Capacity AB underscores ...

NTR develops, constructs, and operates renewable energy projects in circa 66 locations across seven European countries, specialising in wind, solar and energy storage.

The project is a hybrid system combining hydropower and energy storage. The hydropower plant and storage
