As part of the Department of Energy's (DOE) ongoing monitoring of the timely completion of 200 power generation projects, Stage 1 of the Terra Solar Project is advancing ...

The Philippines is sitting on a solar rooftop goldmine, with about 1,846 megawatts of capacity ready to power homes, businesses and industries, according to a think tank.

In Luzon, two high-capacity solar facilities are progressing toward their critical commissioning phase, underscoring ARI's shift in focus to the northern grid. The 211 MWp ...

Within two years, in the first quarter of 2026, five million photovoltaic panels will be connected to a national electricity grid that will ...

Solar energy is at the forefront of this push, given its abundance and cost-effectiveness. The country's high solar irradiance ...

The Southeast Asian country installed over one gigawatt of generation capacity this year, with most of the plants fed by renewable sources.

In our recent conversation on Power Podcast, Ruth Yu-Owen, President and CEO of Upgrade Energy Philippines (UGEP), traced how the company's steady expansion from rooftop solar ...

Within two years, in the first quarter of 2026, five million photovoltaic panels will be connected to a national electricity grid that will be completely relieved. The project is called ...

A new solar mapping tool in the Philippines shows that the country's rooftop solar capacity exceeds 1.8 GW. Its creators say the platform can be used to track unregistered solar ...

Solar energy is at the forefront of this push, given its abundance and cost-effectiveness. The country's high solar irradiance makes it an ideal location for solar power ...

A new solar mapping tool in the Philippines shows that the country's rooftop solar capacity exceeds 1.8 GW. Its creators say the ...

The Philippines Solar Energy Market is expected to reach 4.25 gigawatt in 2025 and grow at a CAGR of 28.69% to reach 15 gigawatt by 2030. Solar Philippines Power Project ...
