What is LV switchgear?

De-electrifying devices for secure assessment, servicing, and error clearance is also done by switchgear. What is an LV switchgear panel? The LV switchgear panel comprises two layers of metal enclosures, permanent and disengageable, for which different electronic devices and accessories are housed.

What is a high voltage switchgear?

Typically used in power substations and industrial plants, these high voltage (HV) switchgear devices are designed to withstand high voltage levels and provide protection against power surges and short circuits to transmit electricity over long distances.

What are MV Switchgear systems used for?

Common uses of MV switchgear systems are found in medium to large-sized commercial and industrial facilities that incorporate switches, circuit breakers, current transformers (CT), potential transformers (PT), control panels, and more.
