Why are Chinese solar panels booming in Southeast Asia?

Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions. While Cambodia is still primarily an agrarian economy, solar panels were the Southeast Asian country's top export to the U.S. last year, according to data from consultancy Oxford Economics.

Why are solar panels uncompetitive in Southeast Asia?

The American Alliance for Solar Manufacturing Trade Committee also argued that Southeast Asian companies received an unfair level of subsidies, making U.S.-made solar panels uncompetitive. Chinese-owned solar manufacturing facilities have popped up across Southeast Asia as companies sought to navigate U.S.-China trade frictions.

Will the US impose tariffs on solar panels from South East Asian countries?

The US Commerce Department has announced plans to impose tariffs of up to 3,521% on imports of solar panels from four South East Asian countries. It comes after an investigation that began a year ago when several major solar equipment producers asked the administration of then-President Joe Biden to protect their US operations.

Why are Chinese solar panels relocating to Malaysia?

Over the past decade, Malaysia, along with other South-east Asian countries like Vietnam and Thailand, has been a key destination for Chinese solar panel firms relocating their operations to bypass US tariffs on direct imports from China.
