Can you put solar power in a shipping container?

There are many ways to skin a cat, and even more ways to add solar power to a shipping container. To be fair, I cheated a bit. Well, not really cheated, but I just went with a retail solar generator system instead of DIYing that part myself from la carte components.

Should you upgrade your shipping container home with solar power?

Upgrading your shipping container home or your container office with solar power can help to reduce electricity costs or even make the transition to off-grid living possible. These systems can power heating, lights, computers, etc. making them highly convenient for shipping container homes, offices and so on.

Can solar power make shipping container-based facilities self-sustaining?

One example is Clinic in a Can, who provide fully equipped medical clinics inside solar-powered shipping containers. The Clinic in a Can project is a great example of how solar power can make shipping container-based facilities completely self-sustaining.

How many solar panels in a 20ft shipping container?

A 20ft shipping container can typically accommodate 6 to 12 solar panels, depending on panel size and mounting configuration. With six to twelve 300W panels, you can expect around 1.8 kWp to 3.6 kWp of power. For more compact setups or higher-efficiency panels (400W or more), up to 12 panels could generate as much as 4.8 kWp.

Here's how I did it. There are many ways to skin a cat, and even more ways to add solar power to a shipping container. To be fair, I cheated a bit.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
