-----

CATL intends to sell sodium-ion batteries into all sorts of industry segments -- passenger EVs, commercial EVs, and stationary energy storage systems.

Explore the latest sodium-ion battery developments by CATL, BYD & Huawei, which promise to reshape energy storage technology

It mainly focuses on sodium-ion battery products, and its potential applications cover low-speed electric vehicles, large-scale energy storage, electric vehicles, national security and ...

New sodium-ion developments from CATL, BYD, Huawei Sodium-ion batteries are undergoing a critical period of commercialization with Chinese cleantech juggernauts actively ...

CATL plans large-scale sodium-ion battery deployment in 2026 for swap systems, EVs, and energy storage. Its Naxtra cells offer up to 175 Wh/kg energy density, -40 °C ...

Discover how China launched its first lithium-sodium hybrid energy storage power station, combining the cost-effectiveness of sodium-ion and performance of lithium-ion ...

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

The development of sodium-ion technology has progressed alongside broader national energy storage and new energy vehicle strategies in China, with related policies and ...

By improving first-time coulombic efficiency, optimizing cycle performance, and extending battery life, this

patented technology will play a key role in the widespread adoption ...

In addition to ultra-large-scale energy storage projects, Huawei also started to deliver large-scale 2MWh energy storage projects to the Japanese market this year, but Huawei has not yet ...
