How much does energy storage cost in India?

Recent energy storage auctions in India reveal record-low prices, with unsubsidized standalone battery storage bids at 2.8 lacs/MW/month and solar+storage bids at 3.1-3.5 lacs/MW/month.

What are the latest auction results for battery energy storage in India?

Specifically, recent auction results for storage have been record-breaking: the latest tender for standalone battery energy storage systems (BESS) with two hours' duration in April 2025 saw a winning bid of 2.8-2.85 lacs/MW/month, without any subsidy like the Viability Gap Funding.

What are the tender rules for solar projects in India?

Under tender rules, each megawatt of solar capacity must be paired with at least 500 kW/2 MWh of energy storage. The projects may be located anywhere in India but must be connected to the Inter-State Transmission System. This content is protected by copyright and may not be reused.

How can solar power improve grid reliability in India?

Each project requires integrating 1000 MW/4000 MWh of energy storage, charged exclusively by solar power. This initiative supports India's climate goals and enhances grid reliability by addressing solar power intermittency.

The storage costs reflected by the latest auction prices in India have profound implications for the costs of a flat block of power - i.e., a solar+storage system can supply a steady stream of ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total ...

State-owned SECI on Thursday invited bids for setting up a 2,000 MW solar project with co-located energy storage systems in India.

new opportunities for clean and ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both ...

Plummeting costs of solar and battery storage in India along with technological improvements are opening new opportunities for clean and low-cost power generation. Recent energy storage ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, ...

The order applies to manufacturers, importers, distributors, retailers, sellers and lessor of solar PV systems and components. Products meant exclusively for export are ...

The result marks the first time a solar-plus-storage configuration in India has fallen below the INR 3/kWh threshold. The tender attracted several new participants to the hybrid ...

Energy Storage Systems (ESS) Policies and GuidelinesEnergy Storage Systems (ESS) Policies and Guidelines

SECI has invited bids for 2,000 MW of grid-connected solar projects with co-located energy storage, aiming to stabilize India's renewable energy grid. Each project ...

These proposed measures aim to enhance grid stability, improve energy reliability, and optimize energy utilization while supporting India's target of achieving 500 GW renewable ...
