AEPC's solar irrigation program has been very effective in promoting solar irrigation and making solar irrigation one of the mainstream technologies in the Terai region.

The irrigation plant comprises the renewable energy technology of 14.4 kW Solar Panel with 32 modules (capacity = 450 W), 15 kW submersible water pump controller, and a ...

Solar water pumping is most competitive in regions with high solar insolation. Solar water lifting systems are very effective in rural areas where grid supply is difficult and costly to extend.
