Bidirectional vehicles employed for building resilience and or load management may qualify for mobile storage financing with various FEMP programs (UESC, ESPC, ESPC ENABLE, ...

This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an existing hybrid energy storage system.

There is one virtual payment system that works seamlessly with EV charge subscriptions and removes the need for physical credit, debit, or RFID cards: digital wallets. ...

Housed in a durable 10-foot ISO container, the Charge Qube is an all-in-one energy storage and charging system that integrates into existing energy networks or operates ...

Designed for speed and efficiency, the Charge Qube can be rapidly deployed without the need for complex planning or infrastructure upgrades. Housed within a durable 10-foot sea container, it ...

Housed in a durable 10-foot ISO container, the Charge Qube is an all-in-one energy storage and charging system that integrates into ...

This paper identifies the role of policy and technical solutions in alleviating common charging barriers for multifamily residents, including barriers posed by limited payment options, ...

Battery pack maker Felten has announced the debut of its new mobile energy storage product, the Charge Qube. The Charge Qube is a rapidly-deployable, modular mobile ...
