According to Jorge Islas, Deputy Minister of Energy Planning and Transition, all new intermittent renewable energy plants will require 30% of their capacity in batteries, with the batteries ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid ...

But according to a new report from energy think tank Ember, fully unlocking this potential will depend on rapidly scaling battery storage while narrowing the gap between Mexico's high ...

Mexico's CFE (state utility) raised industrial tariffs by 9.4% in 2024, pushing factories toward off-grid alternatives. A single 40ft mobile solar container with 200 kWh battery storage now ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

The report highlights Mexico's introduction of the region's first regulation requiring all solar and wind power plants to install battery systems equivalent to 30% of their installed ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that ...

New investment rules spark a wave of large-scale solar and battery proposals, boosting confidence and
