Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

With its unmatched strength, versatility, and resilience, solar steel has become indispensable in creating reliable, long-lasting solar installations. The average solar panel is ...

This research explores how to design an optimized large-scale rooftop PV system for steel manufacturing to maximize performance and profitability. The methodology involves ...

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight ...

Future-proofing steel processing with renewable energy solutions is essential for creating a sustainable and resilient industry. Solar, wind, hydrogen, biomass, and geothermal energies ...

In so-called Agri-PV systems, for example, the photovoltaic modules are mounted on steel supports at a height of a few meters, leaving the area below usable for agricultural ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, ...

Increase the efficiency of your photovoltaic projects with our modular carports made of structural steel.

Execute photovoltaic farm projects based on certified mounting systems with a ...

Galvanized steel, known for its corrosion resistance and longevity, is a staple in solar infrastructure. Its application in trackers and mounting systems ensures the durability of ...

With our cost-saving, long-life steel components and systems, we are among the leading providers of mounting frames for the promising photovoltaic market. In the field of renewable ...

Our solution uses an intelligent containerized energy storage system equipped with integrated foldable photovoltaic panels. During use, the container is opened on one side, and the ...
