What is a containerized water treatment system?

An advantageous aspect of containerized solutions is its function as a mobile water treatment system for different sites once a task is completed. These systems are made to be flexible and durable for use in any setting, and come equipped with many options. Some of the aspects that our mobile water treatment systems are designed to address include:

What is a containerized water purification system?

By choosing pre-designed, module-sized plants, fully assembled in standard 20-ft and 40-ft containers with the option for a 10-ft as well, the complexity and construction of building water purification systems are no longer necessary. Containerized water treatment systems are shipped out to where the potable water is needed.

Why is pure Aqua a containerized water treatment system?

Pure Aqua designs containerized equipment through collaborative solutions that help facilitate the process. Mobility, durability, and protection are all important features that we make sure to incorporate within our mobile water treatment systems, which also helps reduce long-term costs.

How can a containerized water treatment system help a large-scale reverse osmosis plant?

Take the difficulty out of large-scale reverse osmosis plants with containerized water treatment systems. By choosing pre-designed, module-sized plants, fully assembled in standard 20-ft and 40-ft containers with the option for a 10-ft as well, the complexity and construction of building water purification systems are no longer necessary.
