What is insulated double paned tempered glass?

Insulated double paned tempered glass refers to 2 layers of glass construction in our windows and doors! Filled with argon gas in between, each door and window is insulated in a solid metal construction. We even offer triple glazing for extreme weather conditions! What is Argon Gas?

Are insulated glass panels a good choice for commercial buildings?

Insulated glass panels are extensively used in commercial buildings for their energy-saving properties. They enhance thermal insulation, reduce HVAC costs, and create a more sustainable interior environment. Insulated Glass Unit marks a high definition when it comes to insulation and modern interior trends, especially if it's a double pane window.

What are insulated glass panels?

An insulated glass unit containing multiple glass panes, probably 2 or 3, packed together with tight air space between the panels, dispenses insulating traits. This entire course of action makes insulated glass panels used perfectly in tropical countries.

Is double pane glass insulated?

Yes, double pane glass is insulated glass with two layers of glass and a gas-filled space in between to save energy and keep your home comfortable. The R-value of insulated glass tells how good it is at keeping your home insulated. A higher R-value means better comfort and energy savings.
