Does Nassau & Suffolk County offer solar rebates?

Nassau and Suffolk counties have solar rebate programs. These programs help with residential solar tax benefits and encourage more people to go solar. Nassau offers up to \$2,500 for homes and \$10,000 for businesses. They limit funding to 100 homes a year. Suffolk gives similar amounts but accepts applications all year.

Is Long Island a good place to install solar?

Long Island is very friendly to solar energy. The mix of utility rebates, county programs, and local incentives makes it a great place for solar. PSEG Long Island has a generous solar incentive program. They offer cash rebates from \$300 to \$1,000 per kilowatt installed, based on your system size and when you installed it.

How much does solar cost in Long Island?

Long Island's high electricity rates make solar very appealing for homeowners. Rates average \$0.22 per kilowatt-hour, which is higher than the national average. A typical Long Island home uses 10,000-12,000 kWh a year. This leads to bills of \$2,200-\$2,640 annually. Your solar system can cut these costs by 80-100%, depending on size and usage.

What is the NY-Sun Solar Rebate program?

The NY-Sun program provides solar installation rebates for homes in 2025. These rebates reduce your solar costs right away. Rebate amounts vary by region and system size, with Long Island homeowners often getting a lot of support. Funding is given out on a first-come, first-served basis. It's important to act fast when you decide to go solar.
