How did the New Zealand energy crisis affect solar PV?

In 2024, PV Tech reported on the New Zealand energy crisis, which was triggered by wholesale pricing spikes due to gas shortages and low rainfall affecting the country's hydroelectric resources. This crisis highlighted the need for diversification in New Zealand's energy mix, creating opportunities for solar PV expansion.

How much does a PV system cost in New Zealand?

In 2009, the average turnkey price for a standard 3-kilowatt (kW) PV system was about NZ\$40,000; by 2024 the average residential system size had increased to 7 kW while the average cost had fallen to NZ\$16,500.

How much money did ANZ invest in Te Rahui solar project?

The joint venture has also secured NZ\$300 million (US\$177 million) in project financing through the Australian and New Zealand bank ANZ for the first 200MW phase of the project. The Te Rahui solar PV plant, located at Rangitaiki approximately 35km east of Taupo on New Zealand's North Island, will be developed in two phases.

What is Te Rahui agrivoltaics?

Te Rahui will include 900,000 solar PV modules spread across a 1,022-hectare site that was previously used as a dairy farm. The JV plans to incorporate sheep grazing under solar modules into the project design in a practice known as agrivoltaics. The Te Rahui project comes at a critical time for New Zealand's energy sector.

Meridian Energy and Nova Energy have completed agreements to establish a 50-50 joint venture (JV) to build and operate the 400MW Te Rahui solar PV power plant near Taupo, ...

Discover the benefits, challenges, and future potential of solar energy in New Zealand -- from rooftop solar PV systems to emerging grid-scale opportunities.

Kiwi power company Genesis Energy also signed a PPA with telecommunications company Spark New Zealand this week to support the development of the 63MW Lauriston ...

Meridian Energy is building the massive Kokiri solar farm in Waikato, a key step in New Zealand's renewable

energy future. Learn ...

New Zealand's first grid connected solar project close to operational Lodestone and TrinaSolar have completed the build of a third ...

With 250,000 solar panels covering an area the size of 170 rugby fields, Ruakaka Solar Farm will be capable of producing up to 230GWh of electricity per year - enough to ...

As previously covered on PV Tech, Aquila Clean Energy closed a financing deal with Westpac New Zealand for a 180MW portfolio, whereas Genesis Energy and ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output ...

Nova Energy and Meridian Energy have partnered to construct the 400 MW Te Rahui solar farm, which will become the largest solar installation in New Zealand.

As previously covered on PV Tech, Aquila Clean Energy closed a financing deal with Westpac New Zealand for a 180MW portfolio, ...

Meridian Energy and Nova Energy have completed agreements to establish a 50-50 joint venture (JV) to build and operate ...

Meridian Energy is building the massive Kokiri solar farm in Waikato, a key step in New Zealand's renewable energy future. Learn about this major project.
