In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Governor Kathy Hochul today announced that the New York State Public Service Commission approved a new framework for the State to achieve a nation-leading six gigawatts ...

145 MW of community-scale, commercial and industrial (CCI) storage was installed in 2024, a 22% increase over the previous year. California, Massachusetts, and New York ...

Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation ...

A new report indicates that the nation's energy storage market added 12.3 GW of installed battery capacity in 2024. The latest U.S. Energy Storage Monitor report was released ...

A report from McKinsey projects that there will be between 1.5-2.5 terawatts (about 85-140 terawatt-hours) of long-duration energy storage capacity globally by 2040, ...

US battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity. This growth highlights the importance of ...

A zero-carbon future by 2050 would require 930 GW of storage capacity in the U.S 33, and the grid may need 225-460 GW of long duration energy storage (LDES) capacity. 34 Hydrogen, ...

All net new generating capacity in 2026 is forecast to be provided by renewables and batteries, according to new EIA data.

New energy storage power capacity
