Will North Korea build a tile factory in Pyongyang?

North Korea's trade ministry recently approved plans by a North Korean-Chinese joint venture to build tile factories in Pyongyang and in a region near the China-North Korean border.

Where is solar installed in North Korea?

Today, solar can be found on some of North Korea's most important or high-profile civilian factories, outlined below. The factories were chosen for the size of the installation and their notability, usually though consistent mentions in state media reporting.

Does North Korea have solar?

However, despite its growing prominence, solar installations still only make up a fraction of office and factory rooftops in North Korea. Today, solar can be found on some of North Korea's most important or high-profile civilian factories, outlined below.

Are solar panels a real thing in North Korea?

Larger solar installations have also sprung up at factories and government buildings over the past decade. Jeong-hyeon, a North Korean escapee, told the Financial Times that many residents in Hamhung, the second-most populous city, "relied on a solar panel, a battery and a power generator to light their houses and power their television".
