Over 5,000 Oslo households now participate in a blockchain-based energy sharing network. Their home batteries automatically trade electricity during peak hours, creating what ...

Our current projects include several large-scale solar developments, battery energy storage systems co-located with our existing power stations, and expansion of the Shoalhaven pumped ...

Picture lithium batteries as the Swiss Army knives of energy storage - compact, versatile, and surprisingly powerful. In Oslo's context, they're the backbone of systems storing ...

Let's cut to the chase: Oslo builds largest energy storage station, and it's not just another infrastructure project. This 1.2 GWh behemoth, set to power 180,000 homes during ...

First, this paper establishes an optimization configuration model for distributed energy storage with the objective of minimizing load shedding in the non-fault loss of power ...

Technip Energies (PARIS: TE) has been awarded a large(1) Engineering, Procurement, Construction (EPC) contract by Hafslund Oslo Celsio, the largest supplier of district heating in ...

In this paper, a distributed location and capacity planning method for energy storage power plants considering multi-optimization objectives is proposed.

As Oslo proves, off-grid solar storage isn't about surviving the apocalypse - it's about rewriting the energy rulebook. And if they can do it with six months of winter and 3AM ...

Technip Energies has been awarded a large EPC contract by Hafslund Oslo Celsio, the largest supplier of
