In this review, we give an overview of the applications of plasma activated water (PAW) and its chemistry in the field of agriculture. This article concentrates on the chemistry of ...

At Buwatec, we design modular storage solutions that combine strength, efficiency, and sustainability. Our steel-based systems are engineered for long service life, easy installation, ...

By evaluating the hybrid storage solutions on the basis of LCC, LPSP, and LOLP, this research provides critical insights into the most efficient and sustainable storage options ...

Plasma-nanobubble hybrid technology is a cutting-edge innovation combining the benefits of plasma with nanobubble technology in order to improve crop production.

In this review, we give an overview of the applications of plasma activated water (PAW) and its chemistry in the field of agriculture. ...

This article will explore these applications and demonstrate why Solico Tanks is a leader in providing sustainable water storage solutions for agriculture and farming projects ...

This review paper aims to provide an overview of recent achievements in plasma agriculture, highlighting the significant advancements made in the ...

SBS Tanks provide tailored water storage solutions for farms, optimizing irrigation and livestock watering. With durable materials and customizable configurations, our tanks ensure reliable ...

This study explores the design and adaptation of a shipping container into a portable irrigation control station
