Where can a solar container be used?

Possible locations are therefore remote villages, development and crisis areas, mining, venues or deployments in extreme weather events. In order to be able to use the high PV output when there is limited sun exposure, the solar container can also be used in combination with an energy storage device.

What is a solarcontainer?

Solarcontainer explained: What are mobile solar systems? The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

Why should you choose solarcontainer?

The traceabilityof all Solarcontainer components can be guaranteed at all times. Spare parts are kept in stock and can be delivered quickly if required. The areas of application and use cases are wide-ranging. This results in very general use cases such as:

Learn about solar on-site energy containers, their pricing factors, and how they can provide environmentally friendly, temporary energy for construction sites and events.
