-----

The Independent State of Samoa and Electric Power Corporation (EPC) is seeking proposals from qualified Independent Power Producers (IPPs) to ...

In collaboration with Eastern Power Solutions (EPS), a turn-key solar energy service provider, the solar-plus-storage projects will support American Samoa Power Authority ...

500 household solar systems acting like a coordinated ballet troupe instead of toddlers with tambourines. That's Samoa's next phase - creating a distributed energy network ...

Situated in a region with high solar irradiance, the territory is well-positioned to benefit from solar energy paired with energy storage systems to address intermittency and ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

In collaboration with Eastern Power Solutions (EPS), a turn-key solar energy service provider, the solar-plus-storage projects will support American Samoa Power ...

ADB has signed a transaction advisory services agreement with Samoa's Electric Power Corporation (EPC) to support the development of a solar photovoltaic and battery ...

The Independent State of Samoa and Electric Power Corporation (EPC) is seeking proposals from qualified Independent Power Producers (IPPs) to provide a total "turnkey" project ...

The first of three storage projects is completed, enabling the island to integrate its solar energy production and enhance grid reliability.

Situated in a region with high solar irradiance, the territory is well-positioned to benefit from solar energy paired with energy storage ...

With 42% of Samoa's electricity now generated from renewable sources (World Bank 2023), solar inverters have become the backbone of solar projects across the archipelago.

Summary: Explore how Samoa's innovative 2MW hybrid renewable energy project combines wind, solar, and advanced battery storage to achieve energy independence. Discover its ...
