As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.

French independent power producer (IPP) Qair has secured a US\$5.7 million senior debt facility to finance the development of a 5.8MW ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The panels can be folded inside the container for easy transportation and storage, and can also be quickly unfolded when ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular ...

Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency.

French independent power producer (IPP) Qair has secured a US\$5.7 million senior debt facility to finance the development of a 5.8MW floating solar (FPV) project off Mahé ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.
