The PSE Druzmirje floating solar plant marks a critical milestone for Slovenia's clean energy transition. As the country shifts from small-scale solar systems toward large, grid ...

By embarking on the installation of a large-scale floating PV system, HSE is joining a select group of developers spearheading innovative solar power projects in Southeastern ...

This substantial capacity will position it as Slovenia's largest solar project and, upon completion, potentially Europe's largest floating solar array, surpassing a 74.3 MW array ...

Slovenia's plan to build a 140 MW floating solar power plant on Smartinsko Lake is a bold and visionary step towards a sustainable ...

With an indicative power of up to 140 MWp and an estimated annual production of about 140 Gwh of electricity, the floating solar power plant is anticipated to cover no more than ...

Slovenian energy company is moving forward with a 140 MW floating solar project, which could become the largest in both Slovenia ...

Slovenia's state-owned power generation company, Holding Slovenske Elektrarne (HSE), is developing a 140 MW floating solar power plant at Lake Druzmirje, near Sostanj in ...

With an indicative power of up to 140 MWp and an estimated annual production of about 140 Gwh of electricity, the floating solar power ...

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning activities. The solar plant is set to become ...

The floating solar power plant is set to cover up to 50% of the lake's surface. It is expected to generate 140 GWh a year, enough to supply around 35,000 households.

A floating solar power plant is set to be installed on Lake Druzmir (also known as Lake Sostanj), located between the towns of Sostanj and Velenje. The plant will cover up to ...

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning ...
