Slovenia's HSE signs a EUR100M deal for 80 MW of new solar power plants with integrated battery storage, advancing the nation's renewable energy goals for 2050.

By harnessing the power of solar and wind energy, Slovenia is not only reducing its carbon footprint but also enhancing energy security. Investments in battery storage systems and ...

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

Slovenia is steadily accelerating its transition toward decentralized renewable energy, with solar power and battery energy storage systems (BESS) playing an increasingly ...

This effort complements Slovenia's renewable energy expansion targets of 1,400 MW of solar and 70 MW of wind capacity, increasing grid flexibility and energy security. The ...

Ever wondered how a country smaller than New Jersey is becoming Europe's hidden powerhouse in energy innovation? Let's talk about Slovenia power storage--a topic ...

This article explores how Slovenia's unique energy landscape benefits from advanced storage technologies, supported by real-world data and actionable insights for businesses.

Slovenian company Soske elektrarne Nova Gorica (SENG) commissioned its first solar power plant - Kanalski Vrh. The facility is at its Avce pumped storage hydropower plant, ...

Since the change in government, Slovenia accelerated efforts to increase power generation from renewable

sources, including solar and wind energy. The PM Golob ...

Slovenia's HSE signs a EUR100M deal for 80 MW of new solar power plants with integrated battery storage, advancing the nation's ...

The largest RES share of electricity production is covered by hydro power plants with the overall production share 32-40 %. Slovenian hydro potential is already ~90 % exploit. ...
